Chart Visualization  
D3

Year Range

IP

FDI

GNI

- Instruction: Select a button to change the view of the economic indicator...

Save Chart  
Note: For future??

## COMPONENT

### User Gallery

- Shows saved views ( are these modifiable?)
  - User profile information?
- Company Info? Company accounts for teams?
- Privacy (what type of encryption is required)?
  - Security ?

### Chart Visualization D3

## App.js

Material UI Links at top: on NavBar that is semi-transparent, sticky

- Economic Research
- Italian Financial Journal (Milanese)
- Eurostat link
- Professore Barbagallo Link (???), University of Napoli

## App.js: DataP refactor in REACT

Homepage shows examples of charts created in D3 of Italian economic indicators shown: PIL, Prodotto Interno Lordo;

IDE, Investimento Diretto all'estero

RNL: Reddito Nazionale Lordo

IP: Vendite delle proprieta' intellettuale

chart example

- adjustable handles
- shows three economic indicators combined
- limited to 40 year scope (or 20 year min.)
- chart cannot be saved (made for play)
- eye-candy at bottom

- Glitch.me

Consider prototyping some of this in glitch

Register/ Sign-In  
Link (Bottom)

## COMPONENT

Register/ Sign-In Page  
(simple spare UI)

See "Login" page developed already for a different client.

- Create custom chart
- 

Note:

- Use node.js ?
- Use routing ?

Is all of this possible in scope of this project?

Are all components routed through the sign-up/register?
